PROJECTS

TATA NEU- Live the Neu (iOS)

2.4 Years.

This iOS App will help its customers to Purchase all the Tata Products at one Platform. In this App development, I will be responsible for architecting and maintaining the Payment Module during purchase journey for smooth payment experience to its customers through their desired instruments i.e. Card, NetBanking or UPI.

Picture Perception

2 months.

This will use any image clicked or inserted as input for the program, after which the multiple objects existing in the picture will be detected. These objects will be then classified and added to the sub categories. After that array with the objects name will be created and by Using NLP a story will be generated.

City Cab Application (Android)

2 months.

This Android Application will help its customers to book their Cab for traveling.
